SUMMARY

I am a passionate AI/ML enthusiast and AWS AI/ML Scholar '23, with a strong ability to apply theory to real-world challenges. As a driven and adaptable final-year student majoring in Computer Science and Engineering, I am dedicated to using my academic foundation and proactive approach to contribute effectively in a professional environment. I am eager to take on practical challenges and I am seeking an opportunity where I can apply my skills, learn from experienced professionals, and make meaningful contributions to the team and organization's success.

EDUCATION

Panimalar Engineering College - Chennai

Bachelor Of Engineering in Computer Science

2021 - 2025 CGPA - 8.9

(upto 6th semester)

Virutcham International Public School -

Cheyyar

HSC 2021 - 94%

(CBSC)

Round Table 30 Vivekananda Vidyalaya

School - Chennai

SSLC 2019 - 91.2%

(CBSC)

SKILLS

- **Programming Languages:** Python, C, and Java.
- **Data Analysis:** Pandas, NumPy and Matplotlib.
- **Database Management:** MySQL.
- **Future Scope Skills :** GenAI, LLMs.
- **Soft Skills:** Effective communication, Problem Solving skills.

CERTIFICATIONS

- AI for real world application by **TCSion**
- AI programming with Python **Nanodegree** offered by **Udacity**
- Foundations of Cybersecurity by **Google**
- **Microsoft Certified:** Azure AI Fundamentals
- **Oracle AI** Certified Foundation Associate secured 96.7%
- Bridge Course on **Cloud Solution Architect** certified by CDAC

INTERNSHIPS

AI INTERN

Cognizant Technology Solutions

July 2024 - present

Developing an AI-based application utilizing large language models (LLMs) to enhance user interactions and automate processes.

AI&ML INTERN

Datex Technologies Private Limited

Feb 2024 - March

Developed a loan prediction system utilizing machine learning algorithms to accurately forecast loan approval probabilities.

INTERN

The Spark Foundation

Dec 2023 - Jan 2024

Implemented an advanced Traffic Sign Recognition system using deep learning algorithms.

AI&ML INTERN

YBI Foundation

Nov 2023 - Dec

As an AIML intern at YBI Foundation, gained practical experience in training models, specializing in linear regression, decision tree, and comprehensive exposure to various machine learning algorithms.

PROJECTS

- **Pilgrims Safety Wild Animal Detection System** - Developed a software application using **YOLOv5** in Roboflow as mini project in 6th semester.
- **Live ECG Monitoring System** - Revolutionizing patient care through advanced ECG monitoring system with OCR tech for precise data capture, Google Sheets for centralized storage, and Twilio/Gmail integration for rapid alerts and communication.
- **Enhancing Anomaly Detection Using Transfer Learning and GANs** - Developed a cutting-edge anomaly detection system by integrating transfer learning (TL) with generative adversarial networks (GANs) to enhance accuracy and robustness

EXTRACURRICULAR

AI/ML and Deep Learning Club,

Year: 2022 - 2025

- Role: Co-Lead
- Organized and conducted workshops for over 600 students on topics related to AI, ML, and Deep Learning.
- Led a team of members to develop projects and organize events.
- Enhanced public speaking, leadership, and project management skills.

Neuro Nexus,

Year: 2023 - 2024

- Role: Co-Lead
- Facilitated collaborations and knowledge-sharing sessions on neuroscience and technology.
- Successfully handed over the leadership to junior members, ensuring a smooth transition and continuity.
- Improved strategic planning and mentoring skills.

Digital Nurture 3.0, Cognizant Technology Solutions

Year: 2024

- Role: Participant
- Engaged in 8-10 hours of weekly training focused on digital technologies and professional skills.
- Completed various projects and assignments, demonstrating commitment and time management.
- Developed skills in digital tools, programming, and industry best practices.

ACHIEVEMENTS

- **Appreciation for Conducting AI/ML Workshop**
 - Received recognition from the department for successfully conducting a 1-week AI/ML workshop for junior students, demonstrating leadership and knowledge-sharing skills.
- **1st Prize in Department-Wide Coding Competition**
 - Secured 1st place in a department-wide coding competition, showcasing strong problem-solving abilities and programming expertise.

LEADERSHIP

Project Team Lead

- Led a cross-functional team in the successful completion of innovative projects, including the development of an AI-based solution and a real-time monitoring system.
- Coordinated tasks, managed timelines, and facilitated communication between team members, ensuring project goals were met on time.

Workshop Coordinator

- Organized and coordinated a week-long AI-based workshop for junior students, focusing on hands-on projects and practical applications.
- Helped juniors enhance their understanding of AI concepts and tools, providing mentorship and guidance throughout the workshop.

Co-Lead, AI/ML and Deep Learning Club

- Co-led the AI/ML and Deep Learning Club, overseeing the planning and execution of events, workshops, and mentorship programs.
- Fostered a collaborative environment, mentored junior members, and expanded the club's reach through strategic initiatives and partnerships.
